

TA Name (Tick one): Adnan , Jeremy, Salvador

Group number/time/day of the week

Group members present:

Professors presented

	Item	Max points	Points
1	First interaction mode is working		
	Sensor is working as intended	5	
	Actuator is working as intended	5	
2	Second interaction mode is working		
	Sensor is working as intended	5	
	Actuator is working as intended	5	
3.	Have all student contributed to the technical work	2	
	Answers given to Q&A (Ask 2 questions per student)	8	
4	It animatronics is not working, did the student present a video of the animatronics working?	Yes/No	
5	Negative marking (-2 points for each)		
	Grand total	30	

NOTES (also see next page)

Negative marking for things such as (this not an exhaustive list)

- 1) The two sensors are not different
- 2) Professor face not used
- 3) Professor voice not used
- 4) Teleoperation (only voice may be tele-operated)

Questions to ask the students (ensure that all students are asked questions)

1. Who did what task?
2. How were the sensors interfaced (ask specifics)?
3. How were the motors interfaced?
4. How were the joints design and built?
5. How were the sensors calibrated?
6. How does the motors work?
7. What were the lessons learnt?
8. What will you change if you have to redo this project?
